

FIDELIS CARE NEW YORK – DEPARTMENT OF PHARMACY SERVICES
J-Code Prior Authorizations & Required Clinical Information
 Medicaid, Child Health Plus, HealthierLife, Metal-Level

Updated: 3/9/2017

J-Code	Trade Name	Drug Name	Required Medical Information
J0129	Orencia	Abatacept	<ul style="list-style-type: none"> • Previous medication history with trial dates and outcomes • Documented patient weight, tuberculin skin test results or quantiferon gold lab results within 12 months, immunization history • History of present disease state and progression in medical records
J0135	Humira	Adalimumab	<ul style="list-style-type: none"> • Previous medication history with trial dates and outcomes • Documented patient weight, tuberculin skin test results or quantiferon gold lab results within 12 months, immunization history • History of present disease state and progression in medical records
J0180	Fabrazyme	Algalisidase beta	<ul style="list-style-type: none"> • Enzyme assay showing deficiency of alpha-galactosidase activity or DNA testing • Copies of lab results e.g. IgG, IgE • Documented patient weight • History of present disease state and progression in medical records
J0205	Ceredase	Alglucerase	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Documented patient weight • Copies of lab results e.g. CBC, platelets, liver function tests, plasma glucocerebroside, IgG antibody
J0215	Amevive	Alefacept	<ul style="list-style-type: none"> • Previous medication history with trial dates and outcomes • Copies of lab results e.g. CD4⁺ T-lymphocyte, transaminase • Immunization history, body surface area affected, tuberculin skin test results or quantiferon gold lab results within 12 months • History of phototherapy trial if applicable
J0220	Myozyme	Alglucosidase alfa	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Documented patient weight • Copies of pertinent lab results e.g. IgG & IgE antibodies
J0221	Lumizyme	Alglucosidase alfa	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Documented patient weight • Copies of pertinent lab results e.g. IgG & IgE antibodies

J0256	Prolastin-C Aralast-NP Zemaira	Alpha 1-proteinase inhibitor	<ul style="list-style-type: none"> • Documented patient weight, FEV₁, pulmonary function tests, Hepatitis B status, smoker status • Copies of pertinent lab results e.g. AAT levels or genetic testing confirming AAT deficiency • History of present disease state and progression in medical records
J0257	Glassia	Alpha 1-proteinase inhibitor	<ul style="list-style-type: none"> • Documented patient weight, FEV₁, pulmonary function tests, Hepatitis B status, smoker status • Copies of pertinent lab results e.g. AAT levels or genetic testing confirming AAT deficiency • History of present disease state and progression in medical records
J0270	Caverject	Alprostadil injection	<ul style="list-style-type: none"> • Appropriate clinical documentation per indication
J0275	Muse	Alprostadil urethral suppository	<ul style="list-style-type: none"> • Appropriate clinical documentation per indication
J0476	Lioresal	Baclofen intrathecal	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J0480	Simulect	Basiliximab	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Planned immunosuppressive regimen containing tacrolimus, belatacept, sirolimus, or cyclosporine • Copies of pertinent lab results e.g. CBC with differential
J0490	Benlysta	Belimumab	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Documented patient weight, immunization history • Copies of pertinent lab results • Previous medication history with trial dates and outcomes
J0570	Probuphine	Buprenorphine implant	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J0571		Buprenorphine	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J0572 J0573 J0574 J0575		Buprenorphine/ naloxone	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes

J0585	Botox	Onabotulinum toxinA	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J0586	Dysport	Abobotulinum toxinA	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J0587	Myobloc	Rimabotulinum toxinB	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J0588	Xeomin	Incobotulinum toxin A	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J0592	Buprenex	Buprenorphine	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J0597	Beriner	C1-esterase inhibitor	<ul style="list-style-type: none"> • Documented patient weight • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes • ≥ 12 years of age
J0598	Cinryze	C1-esterase Inhibitor	<ul style="list-style-type: none"> • Documented patient weight • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes • ≥ 9 years of age
J0638	Ilaris	Canakinumab	<ul style="list-style-type: none"> • Documented patient weight, immunization history • History of present disease state and progression in medical records • Copies of lab results e.g. CRP and amyloid A levels, CBC with differential, tuberculin skin test results or quantiferon gold lab results within 12 months • Previous medication history with trial dates and outcomes
J0706	Cafcit	Caffeine citrate	<ul style="list-style-type: none"> • Documented patient weight, serum caffeine levels • Gestational age • History of present disease state and progression in medical records
J0717	Cimzia	Certolizumab pegol	<ul style="list-style-type: none"> • Previous medication history with trial dates and outcomes • Documented patient weight, tuberculin skin test results or quantiferon gold lab results within 12 months, immunization history
J0725	Novarel, Pregnyl (Multiple)	Chorionic gonadotropin	<ul style="list-style-type: none"> • Copies of pertinent lab results e.g. serum fasting testosterone levels, FSH & LH level • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes

J0775	Xiaflex	Clostridium histolyticum	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes • Documentation of involvement of metacarpophalangeal or proximal interphalangeal joints • Positive table top test
J0897	Prolia Xgeva	Denosumab	<ul style="list-style-type: none"> • Previous medication history with trial dates and outcomes including concurrent calcium and vitamin D intake • History of present disease state and progression in medical records including fracture history <p>Copies of pertinent lab results e.g. bone mineral density (T score)</p>
J1050	Depo-Provera	Medroxyprogesterone	<ul style="list-style-type: none"> • Appropriate clinical documentation per indication • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J1071		Testosterone cypionate	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes • Copies of pertinent lab results e.g. fasting level of serum total testosterone collected by 10am
J1290	Kalbitor	Ecallantide	<ul style="list-style-type: none"> • ≥ 16 years of age • History of present disease state and progression in medical records • Documented patient weight • Previous medication history with trial dates and outcomes
J1300	Soliris	Eculizumab	<ul style="list-style-type: none"> • Meningococcal vaccine at least 2 weeks prior to treatment, immunization history, • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes <p>Copies of lab results e.g. CBC with differential, lactic dehydrogenase (LDH), serum creatinine</p>
J1322	Vimizim	Elosulfase alfa	<ul style="list-style-type: none"> • ≥ 5 years of age • Documented patient height & weight • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J1325	Fiolan	Epoprostenol	<ul style="list-style-type: none"> • Documented patient weight, right heart catheterization history, baseline 6 minute walking distance test • WHO Group, NYHA Class • Previous medication history with trial dates and outcomes

J1438	Enbrel	Etanercept	<ul style="list-style-type: none"> • Patient weight, tuberculin skin test results or quantiferon gold lab results within 12 months, hepatitis B screening • Previous medication history with trial dates and outcomes • History of present disease state and progression in medical records
J1459 J1556 J1559 J1561 J1566 J1569 J1599	Privigen, Gammagard Gammaplex Carimune (Multiple brand names)	IV immune Globulin	<ul style="list-style-type: none"> • Documented ideal body weight, actual body weight, immunization history • Previous medication history with trial dates and outcomes • Copies of pertinent lab results e.g. serum creatinine/BUN, platelets, Ig levels • Absence of risk factors for acute renal failure and IgA deficiency • History of present disease state and progression in medical records • Documentation of the severity of the condition, including frequency and severity of infections when applicable • Documentation of diagnostic evidence supporting the indication for which immune globulin is requested demonstrating the member meets criteria for the disease specific guidelines for use, if available
J1595	Copaxone	Glatiramer acetate	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Documentation of diagnostic evidence supporting the indication for which glatiamer acetate is requested e.g. MRI results • Previous medication history with trial dates and outcomes
J1740	Boniva	Ibandronate	<ul style="list-style-type: none"> • Previous medication history with trial dates and outcomes including concurrent calcium and vitamin D intake • History of present disease state and progression in medical records including fracture history • Copies of pertinent lab results e.g. bone mineral density (T score)
J1742	Corvert	Ibutilide fumarate	<ul style="list-style-type: none"> • Previous medication history with trial dates and outcomes • Documented patient weight • History of present disease state and progression in medical records
J1743	Elaprase	Idursulfase	<ul style="list-style-type: none"> • Documented patient weight • History of present disease state and progression in medical records • Enzyme assay demonstrating a deficiency of iduronate 2-sulfatase enzyme activity or DNA testing
J1745	Remicade	Infliximab	<ul style="list-style-type: none"> • Documented patient weight, tuberculin skin test results or quantiferon gold lab results within 12 months, hepatitis B status • Previous medication history with trial dates and outcomes • History of present disease state and progression in medical records

J1786	Cerezyme	Imiglucerase	<ul style="list-style-type: none"> • Documented patient weight • Documentation of diagnostic evidence supporting the indication for which it is requested • Copies of pertinent lab results e.g. CBC, platelets, hemoglobin, hematocrit, liver function tests, IgG antibody, acid phosphatase, MRI/CT results of liver and spleen • β-glucocerebrosidase enzyme assay, DNA testing, or bone marrow histology confirming diagnosis • History of present disease state and progression in medical records
J1826	Avonex	Interferon beta-1a	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Documentation of diagnostic evidence supporting the indication for which interferon is requested e.g. MRI results • Previous medication history with trial dates and outcomes
J1830	Betaseron Extavia	Interferon beta-1B	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Documentation of diagnostic evidence supporting the indication for which interferon is requested e.g. MRI results • Previous medication history with trial dates and outcomes
J1930	Somatuline	Lanreotide	<ul style="list-style-type: none"> • Copies of pertinent lab results e.g. serum GH, IGF-1, glucose levels, heart rate, gall bladder ultrasonography, TRH tests, CT results of pituitary • History of present disease state and progression in medical records • Previous history of surgery and/or radiotherapy • Previous medication history with trial dates and outcomes
J1931	Aldurazyme	Laronidase	<ul style="list-style-type: none"> • Documented patient weight, alpha-L iduronidase activity or DNA testing confirming diagnosis • History of present disease state and progression in medical records • Previous medication history with trial dates and outcomes
J2020	Zyvox	Linezolid	<ul style="list-style-type: none"> • Copies of lab results e.g. culture, antibiotic sensitivity results, CBC with differential
J2170	Increlex	Mecasermin	<ul style="list-style-type: none"> • ≥ 2 years of age • History of present disease state and progression in medical records • Documented patient height and weight • Copies of pertinent lab results
J2182	Nucala	Mepolizumab	<ul style="list-style-type: none"> • ≥ 12 years of age • Previous medication history with trial dates and outcomes • History of present disease state and progression in medical records • Documented patient height, weight, FEV1 % (without bronchodilator) • Copies of pertinent lab results e.g. IgE levels

J2323	Tysabri	Natalizumab	<ul style="list-style-type: none"> • History of present disease state and progression in medical records • Copies of pertinent diagnostic tests e.g. MRI results • Previous medication history with trial dates and outcomes
J2357	Xolair	Omalizumab	<ul style="list-style-type: none"> • Copies of pertinent lab results e.g. IgE levels, positive allergy tests, pulmonary function tests, smoking status • History of present disease state and progression in medical records e.g. number of asthma exacerbations, ER visits, significant functional impairment • Age \geq 12 years of age • Previous medication history with trial dates and outcomes
J2358	Zyprexa Relprevv	Olanzapine	<ul style="list-style-type: none"> • Previous medication history with trial dates and outcomes • History of present disease state and progression in medical records
J2426	Invega Sustenna	Paliperidone	<ul style="list-style-type: none"> • Previous medication history with trial dates and outcomes • History of present disease state and progression in medical records
